

## Theresa “Kelsy” Green

Innovations in Nuclear Energy Research & Development Student Competition (INSC) Awardee

Kelsy Green is a PhD Candidate in Nuclear Engineering at the University of Michigan-Ann Arbor. She received her Bachelor of Science in Nuclear Engineering from UC Berkeley in 2017. Her research focuses on radiation effects of structural materials for advanced fission and fusion reactors. She worked as a graduate student intern at Los Alamos National Laboratory and transitioned to a Postdoctoral researcher after completion of her PhD in November 2023. Green served as the Climate Change Chair for the International Youth Nuclear Congress until 2022. When she isn't in the lab, she's out running with her pup, baking up pies and cakes, or listening to a history podcast.
